

Why is having a good vision plan so important?

Because taking good care of your eyes can help you take better care of your body.

Regular visits to your eye care professional do more than just protect your eyesight. They can help protect your overall health. Through a routine exam, eye doctors can spot serious health problems like diabetes, high blood pressure, heart disease, certain cancers and other conditions.¹

That's why, even if you have perfect vision, yearly exams are important. Don't let preventable health and vision problems sneak up on you. Vision benefits are there to help you stay on top of your care.

Consider this:

*I never miss my children's games and I chaperone all their dances. One night, as I drove them to the Homecoming dance, I noticed they weren't wearing their glasses. I'm happy my **vision insurance** helps my children feel less self-conscious — and provides a deep discount for contact lenses. Recently, when I had my own eye exam, my doctor caught the early signs of diabetes. Thanks to our vision coverage, I can be there to see my children play every game.**
